

SPECIFIC VOCABULARY**UNIT 8: Invertebrates**

Poriferans		Arthropods	
Sponge		Crustaceans	
Pore		Arachnids	
Osculum		Myriapods	
Atrium		Insects	
Choanocyte		Exoskeleton	
Spicules		Moulting	
Silica (SiO ₂)		Cephalothorax	
Calcium carbonate (CaCO ₃)		Thorax	
Filter-feeder		Abdomen	
Cnidarians		Appendages	
Polyp		Antennae	
Medusa		Simple eye	
Anemone		Compound eye	
Coral		Mouthparts	
Hydra		Chelicerae	
Jellyfish		Pedipalps	
Cnidocyte (Stinging-cell)		Tracheae	
Gastrovascular cavity		Metamorphosis	
Tentacle		Egg	
Colony		Larva (caterpillar)	
Worms		Pupa (chrysalis)	
Nematodes		Echinoderms	
Platyhelminthes		Dermal skeleton	
Annelids		Ambulacral apparatus	
Free-living		Regeneration	
Parasites		Crinoideans	
Separate sexes		Asteroideans	
Hermaphrodites		Ophiuroideans	
Cross-fertilization		Echinoideans	
Self-fertilization		Holothuroideans	
Metameres		Bilateral symmetry	
Bristles		Radial symmetry	
Detritus-feeders		To attach	
Molluscs		To fix	
Gastropods		To move about / around	
Bivalves		To undergo	
Cephalopods		To chew	
Mantle		To pierce	
Radula		To suck	
Shell		To hop	
Valves		To dig	
Beak		To lick
