

READING ACTIVITIES (Answer key)

After reading the text, copy and answer the following questions into your notebook:

2.1. What is the difference between nutrition and feeding?

It is that **feeding** is the process through which animals take in nutrients from foods, while **nutrition** is the join of processes that allow living beings obtain the matter and the energy that they need to stay alive.

2.2. Complete the following chart:

NUTRITION PROCESS	System that carry out it	Substances implicated
Digestion	Digestive system	Foods
Breathing	Respiratory system	Gases (O₂ and CO₂)
Circulation	Circulatory system	Nutrients and wastes
Excretion	Excretory system	Wastes
